LOCATION

Bangkok, Thailand

PROFILE

Gameplay Programmer with a B.S. in Game Design and professional software engineering experience building, debugging, testing, and supporting complex systems. Focused on Unity, C#, gameplay systems, AI, gameplay scripting, and tools programming.

CORE SKILLS

- Unity Engine
- C#
- Game Programming
- Gameplay Systems
- AI Systems
- Gameplay Scripting
- Tools Programming
- Level Scripting
- C/C++
- Technical Design
- Shaders & Materials
- Particle Systems / VFX
- 3D Asset Creation
- Git / Perforce

GAME DEVELOPMENT & EDUCATION

Bachelor of Science in Game Design

Full Sail University 2015 - 2018 • GPA 3.92 • Winter Park, Florida, USA

PROFESSIONAL EXPERIENCE

TBD

QA Manager

Bangkok, Thailand

May 2023 - PRESENT

- Lead quality strategy across 10 cross-functional product squads, coordinating up to 40 QA engineers and partnering with engineering and product teams to improve software reliability and release readiness.
- Designed and developed a Vue.js and Chart.js QA Metrics Dashboard that consolidated defect, regression, and release-quality data into a real-time visibility tool.
- Built and maintained Python ETL pipelines integrating Jira and Qase APIs, automating QA data collection, transformation, and reporting for engineering and leadership.
- Created a JMeter performance-testing framework for critical APIs spanning product catalog, inventory, pricing, orders, and shopping cart services, enabling repeatable scalability and throughput validation.

C·R·E·A Co., Ltd.

Tech Lead

Bangkok, Thailand

Oct 2020 - Apr 2023 • 2.5 Years

- Developed and debugged backend features for a Django REST API supporting an omni-channel platform for managing branded products across eCommerce marketplaces.
- Translated product requirements into technical tasks, planned development sprints, and coordinated delivery for a software team of up to seven developers.
- Designed and implemented a Cypress automated testing suite covering critical application workflows and reducing reliance on repetitive manual regression testing.
- Led delivery of two custom API integrations connecting branded Shopify storefronts with an ERP system to synchronize inventory and order data.
- Developed and customized Shopify themes for multiple branded eCommerce websites, working across application logic, APIs, and front-end implementation.

Santora Nakama Co., Ltd.

QA Engineer

Bangkok, Thailand

Nov 2019 - Sep 2020 • 10 months

- Developed and debugged AngularJS console and controller applications supporting Panya Live, a live-streaming trivia game show, working alongside game and software development teams.
- Developed an Appium-based automated test suite for Android and iOS release candidates, automating repetitive smoke tests across mobile builds.
- Established structured test strategies and comprehensive test plans for new features and releases, improving consistency across the development and QA process.
- Created a reusable manual regression suite with detailed test cases that enabled parallel testing across the team and accelerated release validation.
- Investigated, reproduced, and documented software defects in Jira, providing developers with clear reproduction steps and technical context.

Ace Mart Restaurant Supply

Web Developer

San Antonio, Texas, USA

Mar 2014 - Oct 2015 • 1.5 Years

- Developed and maintained production websites using PHP, WordPress, Drupal, and custom MVC architectures.
- Developed Magento Enterprise modules and customized eCommerce functionality and themes for the company's online retail platform.
- Built an internal software service that automated weekly report aggregation and reporting for the Technology Department.
- Prototyped REST APIs and web applications using PHP, Zend Framework, Slim Framework, and Backbone.js.

AWARDS

Valedictorian Full Sail University • 2018

Advanced Achievement Award Full Sail University • 2018
