SUMMARY

Technical Designer and Gameplay Programmer specializing in Unity, C#, gameplay systems, AI, and custom editor tools.

PROFESSIONAL EXPERIENCE

TBD

QA Manager (May 2023 - PRESENT)
Bangkok, Thailand

- Directed QA strategy for a large-scale marketplace platform, defining test strategy, reviewing test plans, and leading up to 35 QA engineers across 10 cross-functional product squads.
- Designed and developed a custom QA Metrics Dashboard using Vue.js and Chart.js, providing real-time visibility into open defects, regression test execution, and overall release quality.
- Developed and maintained Python ETL pipelines integrating Jira and Qase APIs to automate QA data collection, transformation, and reporting for engineering and leadership metrics.
- Implemented a JMeter-based performance testing framework to validate the scalability, reliability, and throughput of critical business APIs, including product catalog, inventory, pricing, orders, and shopping cart services.

CREA CO., LTD.

Tech Lead (Oct 2020 - Apr 2023) 2.5 Years
Bangkok, Thailand

- Developed and debugged backend features for Django API consumed by ReactJS web application named as CUSP - An omni-channel software solution used to manage branded products on eCommerce marketplaces.
- Wrote requirements, planned sprints, and facilitated agile SCRUM ceremonies for a team of up to seven software development professionals.
- Wrote robust automated testing software suite with Cypress to cover testing of critical features in company software.
- Managed an outsource team to deliver two custom API integrations to sync inventory and orders from custom branded Shopify sites with our ERP system.
- Developed and customized Shopify themes for multiple branded websites.

SANTORA NAKAMA CO., LTD.

QA Engineer (Nov 2019 - Sep 2020) 10 months
Bangkok, Thailand

- Developed and debugged AngularJS console and controller application, and ExpressJS with TypeORM for the Panya Live Streaming Trivia Game Show.
- Implemented a test suite using Appium to automate repetitive smoke tests against Android and iOS release candidates.
- Wrote test strategy and comprehensive test plans to formalize our software testing process.
- Created a manual test suite with detailed test steps that empowered all team members to execute an expedient regression test in parallel.
- Reported well-written defects with steps to reproduce in Jira.

STUDENT IN GAME DESIGN

Full Sail University (2016 - 2018) 3 Years
Winter Park, Florida

- Studied and earn bachelor's degree in game design.

ACE MART RESTAURANT SUPPLY

Web Developer (Mar 2014 - Oct 2015) 1.5 Years
San Antonio, Texas, USA

- Developed and delivered marketing and informational websites with WordPress, Drupal CMS, and custom PHP / MVC solutions.
- Developed Magento EE modules and assisted in customizing website themes for the company's new ecommerce website.
- Developed software service solution to automate weekly report aggregations and reporting for the Technology Department.
- Prototyped APIs and web apps with PHP, Zend, Slim Framework, and Backbone.js MV*.
- Managed domain name renewals and oversaw configuration of DNS settings.
